

Assessment of the USAF Aircraft Accident Investigation Board Report on the F-22A Mishap

FEB 6

The review determined whether United States Air Force Aircraft Accident Investigation Board conclusions were supported by facts consistent with the standards of proof established by applicable Air Force policy. The evaluation found that the AIB Statement of Opinion regarding the cause of the mishap was not supported by the facts within the AIB report consistent with the clear and convincing standard of proof. The report cites five deficiencies contained in the AIB report.
